

HUD's Water Wednesdays

To help HUD project officers and HUD grantees incorporate water efficiency into their programs and projects, the U.S. Environmental Protection Agency's WaterSense® program is co-hosting "Water Wednesdays," a webinar series that will provide information about tools and resources that help public, low-income, and multi-family housing managers save water, energy and money. For more information about the series, visit www.epa.gov/watersense/hudwebinars.

April 29, 2015 @ 2:00 EST

Introducing WaterSense & Quantity Quotes

Veronica Blette from WaterSense will provide a broad overview of the WaterSense program, explaining how the program promotes water efficiency and water-efficient products. In addition, StopWaste.org's **Stephanie Stern** will introduce the new and improved Quantity Quotes, a bulk-purchasing platform where housing managers can find WaterSense-labeled showerheads, lavatory faucets, toilets and other water and energy efficient products.

May 27, 2015 @ 2:00 EST

Communicating the Need for Water Efficiency

Veronica Blette will review the WaterSense program's consumer campaigns. WaterSense campaigns and the associated promotional materials are designed to make it easy to amplify water conservation messages and to help consumers adopt water-efficient behaviors. Additionally, **Joanna Ladd** of the Chinatown Community Development Center—which owns and manages twenty five properties throughout San Francisco and provides affordable housing to over 2400 low income families and seniors—will speak about their water efficiency work and the importance of education and outreach efforts.

June 17, 2015 @ 2:00 EST

WaterSense and LEED Housing Programs

A WaterSense labeled new home includes WaterSense labeled plumbing fixtures, a hot water delivery system that gets hot water to the tap faster, water-smart landscape design, and other water-efficient features. These features allow the home to use 20 percent less water than typical homes. **Jonah Schein** will introduce the New Homes specification, reviewing the criteria and its applicability to newly constructed single-family and multi-family homes. **Asa Foss**, Technical Director for LEED for Homes will provide information on their water efficiency programs and requirements for LEED-certified residential units.
